

BRIZO®

COLLECTION REFERENCE GUIDE
2015-2016

FASHION ISN'T JUST ABOUT CLOTHES.

It's about creating a look. Evoking a feeling. Finding an aesthetic that shakes people to their core. That changes minds, moods and behavior. Fashion can be provocative. Playful. Approachable. Aloof. It can be all of those things at once. The one thing it isn't is predictable. Fashion is about creating the version of ourselves we want to be. And then owning it. Fashion is more than what we wear. It's who we are. Fashion inspires us. And it's reflected in everything we craft, every space we inhabit, every vision we bring to life.

FASHION IS BRIZO.[®] AND BRIZO IS FASHION.

BRAND PILLARS

Distinctive Design

From traditional to modern, classic to contemporary, the Brizo portfolio covers the entire style continuum with collections that provide the perfect finishing touch for any space. No detail is overlooked; indeed, it's our products' unique flourishes and nuances that make them more than just products—but true works of art.

Luxury With A Conscience

We believe strongly in being good citizens of our community, as well as good stewards of the planet. Because for us, it's not just about the products we make—it's about the mark we make on the world.

Inspired Innovation

What is innovation? For some, it's simply another way of saying “technology.” Brizo believes technology is important—and this is reflected in advances like SmartTouch® and H₂Okinetic® technologies—but we believe that innovation is anything new that makes the entire kitchen and bath experience better. This quest is what continually drives us beyond the status quo.

Artful Craftsmanship

From construction to delivery and service, we know the things we make (and how we make them) are an important reflection of us. Our unique design details and quality materials, hand-assembling and individually testing our products—all of these show that “craftsmanship” is more than a word for us. It's part of our DNA.

PROGRESS HAS NEVER LOOKED BETTER.

Brizo® has always believed in the power of innovation. Innovation is what drives technological advancement, leading to quantum leaps forward in functionality and durability. It is also at the core of what it means to be fashionable, where anticipating—and creating—trends is critical to success.

Here are just a few examples of our commitment to forward thinking in the kitchen. These technologies are more than just objects of desire, they're evidence of our desire to never stand still.

SmartTouch® Technology

Allowing you to activate water flow with a simple touch to the faucet body, spout or handle, SmartTouch Technology brings a new level of convenience to the kitchen. This functionality makes it easy to activate water flow only when needed, helping reduce water usage and promoting efficiency of motion. Integrated TempID™ Technology lets you know how warm or cool the water is with an LED light that changes color as the water changes temperature.

Articulating Kitchen Faucet

The Articulating Kitchen Faucet platform represents the next level of culinary innovation by Brizo. Designed to bring greater versatility to common kitchen tasks, the articulating arm offers a larger range of movement than a traditional pull-down faucet—letting you perfectly position the faucet for any task at hand. The distinctive hose won't lose its shape over time, and a collection of innovative technologies, including MagneDock® magnetic docking, help create a workflow that's as smart as it is versatile.

MagneDock® Technology

The first technology of its kind available, MagneDock features a patented, state-of-the-art magnetic docking system. In the kitchen, this system securely holds the spray wand in place when not in use. The durable magnets are made to last forever, while their polarity keeps the spray head perfectly aligned, for a clean, seamless look that maintains the faucet's distinctive form.

DIAMOND Seal® Technology

Our DIAMOND Seal Technology uses a diamond-coated valve to bring you a faucet built to last up to 5 million uses. With its durable components and simple construction, a DIAMOND Seal Technology valve lasts up to 10 times longer than the industry standard (based on ASME 112.18.1 of up to 500,000 cycles).

2-Button, 4-Function Spray Wand

Another example of Brizo leadership through innovation, this feature provides users with exceptional control of their faucet's water flow. Alternate between stream and spray, control the water's volume in stream or spray mode, and even pause and restart the flow—all with two button simplicity. For both cooking and clean-up, take control of your water like never before.

INTELLIGENCE MADE INDULGENT.

Brizo® remains committed to continually advancing the art and science of water in everything we do, merging distinctive design with extraordinary thinking to give our users the ultimate end experience. We're committed to not only using innovations today, but to paving the way for discovering innovations for tomorrow.

It's innovation, inspired.

SmartTouch^{Plus}™ Technology

The next generation of Brizo's revolutionary SmartTouch Technology, SmartTouch^{Plus} adds proximity sensing to our existing touch technology, allowing for both hands-free and touch-sensitive operation. Integrated TempID™ Technology lets you know how warm or cool the water is with an LED light that changes color as the water changes temperature. It's a whole new level of control—and convenience.

TempIQ™ Temperature Control Technology

TempIQ Temperature Control Technology is powered by an electronic thermostatic valve, EPV™, that senses the water temperature before it leaves the spout. An LED light changes color to let you know exactly when water has reached your desired temperature. The valve continually adjusts the hot/cold water mix to maintain a consistent water temperature with no sudden (and unwelcome) increases or decreases, while the true high-temperature limit stop offers an added degree of safety.

Multichoice® Universal Roughs

One rough. A wide range of possibilities. Once the MultiChoice rough is installed, easily upgrade your shower experience or update your trim style without having to go behind the wall. Change your mind. Change your style. This single rough works with any Brizo® pressure balance or TempAssure® thermostatic trim, making the possibilities endless.

Sensori® High Flow Custom Showers

Brizo Sensori high flow custom showers lavishly deliver water in sumptuous amounts—and with passion. At the heart of this system is a ¾" thermostatic valve that delivers a rush of water while peacefully maintaining a consistent temperature within $\pm 3.6^\circ\text{F}$ ($\pm 2^\circ\text{C}$). Separate volume controls mean you are always comfortably in command of this experience. Adjust the flow of water to individual showerheads, handshowers, body sprays and jets for the ultimate in personalized relaxation.

H₂Okinetic® Technology

H₂Okinetic Technology is the study of water in motion, and Brizo Custom Shower Systems were the first to bring this revolutionary technology to market. By controlling water's shape, velocity and thermal dynamics, we've reinvented the showering experience—creating a warmer, more luxurious spray that blankets the body, giving the feeling of a high-flow spray with a fraction of the water.

Hydrati® 2|1 Showers

Hydrati Two-in-One showers offer resounding proof that design, performance and flexibility aren't mutually exclusive. Featuring a showerhead design with an integrated handshower—seamlessly held in place using MagneDock® Technology—Two-in-One showers effortlessly adjust to a wide range of uses. And both the showerhead and handshower incorporate Brizo's exclusive H₂Okinetic Technology, for an immersive, indulgent experience while using less water.
